

At minimum, Nehemiah Products are stamped with a 4-digit date code in the format: YDDD

This Code Can be Translated as follows: the first digit (Y) is the last digit of the year the product was produced. So, a date code beginning with 5 was produced in 2025. The following 3 digits (DDD) are the Julian Date Code. This refers to the day of the year it was produced, from 001 to 365 (or 366 on leap years.) Tables to decode the Julian date are below for both standard and leap years.

Product codes may also contain additional information about the time of production, or production line. (e.g., YDDD HH:MM or YDDD ##) where ## is the number of the production line.
